### **Human Computer Interaction using Hand Gesture ScienceDirect**

Human gesture is a mode of non - verbal interaction medium and can provide the most intuitive, originative and natural way to interact with computers. Our main goal is to make the interaction between human and computer as natural as the interaction between humans. The objective of this paper is to recognize the static hand gesture images (i.e. frames) based on shapes and orientations of hand which is extracted from input video stream recorded in stable lighting and simple background
