### **The cyclic behaviour of soils and effects of geotechnical**

The field observations based on strong motion records indicate the importance of the site conditions, however, the induced level of cyclic stresses are also important due to the differences of the stress strain behaviour of soil layers under different levels of earthquake induced cyclic shear stresses.

**PDF Soil Behaviour under Cyclic Loading ResearchGate**

Fundamental characteristics of soil behaviour during earthquakes are reviewed; field and laboratory evidences of non linearities and energy dissipation mechanisms are presented.
