Workshop on Linear Computer Algebra and Symbolic Numeric

Symbolic-Numeric Computation Algorithms that combine techniques from symbolic and numeric computation have been of increasing importance and interest over the past decade. The necessity to work reliably with imprecise and noisy data, and for speed and accuracy within algebraic and hybrid-numerical problems, has encouraged new interactions between the numerical and symbolic computing fields.

Symbolic Numeric Computation Google Books

The growing demand of speed, accuracy, and reliability in scientific and engineering computing has been accelerating the merging of symbolic and numeric computations. These two types of computation coexist in mathematics yet are separated in traditional research of mathematical computation. This book presents 27 research articles on the

matlab Systems of nonlinear equations Computational

For that, you either need the MATLAB Symbolic Math Toolbox, or you need other software (for instance, you could do symbolic solves in Maple, or Mathematica). If you know Python, I recommend using SymPy or Sage, since these are free alternatives with a symbolic calculation capability.

Exact symbolic numeric computation of planar algebraic

In addition, we significantly limit the types of symbolic operations involved, that is, we only use resultant and gcd computations as purely symbolic operations. The latter results are achieved by combining techniques from different fields such as (modular) symbolic computation, numerical analysis and algebraic geometry.
